Connotations of the Term (Endahu Agaieb) (Applied Theoretical Study)

Abstract :This research studies the connotations of the term (Endahu Agaieb) which means (he has narrated odd Hadiths). The term is used by Hadith critics to describe some Hadith narrators.

The research aims at examining the potency of this term and its effect on the integrity of the narrators described by the term, especially that Al Bukhari and Muslim have narrated for some of them in Sahih Al Bukhari and Sahih Muslim and some of these narrators have been described by other terms which support their integrity. In addition, the research unveils the relation between the term (Endahu Agaieb) and other used terms like (Endahu Bwateel) which means (he has untruths) and the term (Endahu Manakeer) which means (he has denials)...and other terms. It also examines the reasons behind using the term by Hadith critics and whether the term actually influences the integrity of the narrators.
